TECHNICAL SKILLS

Languages: TypeScript , Python

Serverside: Django, Express

Devops: Google Cloud Platform, Github

EXPERIENCE

EltaMD (CP Skin Health Group) | Full Stack Software Engineer | 2024 – Present | Remote

- **Engineered a high-traffic global e-commerce** Next.js site on the VTEX platform supporting thousands of international skincare professionals.
- Develop reusable **WCAG AA-compliant React components**, translating Figma designs into consumer-grade responsive interfaces.
- **Collaborate with product owners and stakeholders** to clarify requirements, make informed technical decisions and deliver value to our 3000+ internal users.
- With more experience **I take initiative to mentor** junior developers, **handle feature negotiations** and improve developer quality of life through CI/CD automations.

Colgate-Palmolive | Software Engineer, Analytics | 2021 – 2024 | New York, NY

- Architected proprietary software using Agile methodologies, streamlining sales planning and supporting global inventory **for 10,000+ businesses**.
- Managed large-scale data migrations from on-premise SAP systems to GCP-based distributed services using django, PostgreSQL and pandas **ensuring data accuracy and high performance**
- Leveraged Python and TypeScript to create data aggregation, disaggregation and pricing algorithms, **automating user data entry and calculations**.
- **Adhered to test driven development** with the use of django unit tests and cypress integration testing while leveraging Github actions to improve resiliency.

California Coalition for Welfare Rights | Lead Software Engineer | 2020 – 2021 | Sacramento, CA

- Led a team of six to **digitize nonprofit workflows** with a React and Express.js application.
- **Reduced infrastructure costs by 30 percent** through a cloud migration, NoSQL schema optimization and improved query performance.

EDUCATION

California State University, Sacramento

Computer Science , Bachelor of Science; Minor in Statistics | 2021
